

This is Jayby Tzub and his mother, Delmei. Jayby is 7 months old and was born with a severe cleft lip. His mom brought him to see us and the Team was able to repair his cleft lip this week before they head back to their home in Stann Creek, Cayo.

This is Della Solomon from the small town of Spanish Lookout in Cayo, Belize. Della is 5 months old and was born with a cleft lip and palate.

This is Alfonso Galvez, a 23 year old man from the town of Santa Elena in Cayo. He sustained a left upper arm injury from a rotating saw four years ago that lacerated his radial nerve. It was never repaired and now he cannot

extend his wrist, thumb and fingers. The Team performed forearm muscle and tendon transfers which after a 6-week recovery will allow him to get back to work doing construction.

This is 5 year old Osvin Garcia with his Mom and Dad. They are from the Frank's Eddy Village in Belize. Osvin had his cleft lip and palate repaired when he was younger. Unfortunately, he developed an opening in the roof of his mouth afterwards (palatal fistula) that results in liquid and food in his mouth coming out his nose when he eats. The Team was able to repair his palate this week and in a short time he will get back to eating normally.
